

April 1 = 190.55
1st Wood River Sunday Apr. 14.

7-m. Hammer the morning
we left (April 23): - Parula,
Geothlypis, Thryothorus,
Tyrannus, Vireo noveboracensis,
Dendroica cerulea, D. discolor,
Pipilo. 2. L. major et aglaeus,
Corvus fl. Minus, Columba
Minotilla, Melospiza georgiana,
Poliophtila, Sturnella, Buteo
lineatus, G. G. Perisoreus,
Melanerpes carolinus, Colaptes
Geothlypis, Anas fulvigula, Savannah
+ Grasshopper Sparrows, Tantalus, Noddy
Green, Night Little Blue + G. heron
Gallinago, M. leucurus, Zenaidura,
Columba pallida, Cathartes, Cathartes
auratus, Chordeiles, Polioptila
Syrnium, Nyctaleus, Agelaius
Cardinalis, Tachycineta, Lanius

925 - M - 526
47 + 526 = 973
973 - 47 = 926

On sick leave of
absence for six months
granted per Par. 17, R. O.
265, A. G. O. dated Nov
10, 1900. { Extended 6 mos. by S. O. No. 88,
par. 21, H. 2.9., A. G. O., dated
April 16, 1901. (Expires Nov. 16, 1901) }

Paid Mr. James A. Han-
cock on account
(in all) \$ 59 ⁶⁵/₁₀₀ April 2/01
Total 64.15 May 1/01

Sparrow, Nighthawk, *Spizella socialis*,
Icterus spurius

June 2, 1901 - 10 m. Creek
Geothlypis trichas, *Chondestes*,
Mniotilta, *Myiarchus*, *Contopus*
viridis, *Spizella socialis*, *S.*
pusilla, *Sturnella*, Grackle,
Crow, Chelidon, Chickadee, *Vireo*
olivaceus, *Spizella pusilla*. Nest
in chinquapin stump close to ground.
About 5 young flew from it. Parent
uttered a metallic chirp, with caten-
=peller in her mouth.

Crows, flock about 30, chasing
a *Buteo*.

Melanerpes erythrocephalus. - Nest
in pine tree on farm;
occupied for several years past;
hole bored just below large
fungus which makes a portico
over orifice to burrow.

Oven Bird, Indigo Bird,
Sitta carolinensis, *Halimastur*,
Wood Thrush, *Antrostomus*,
Phoebastria, *Lalage*, House Wren
Blue Jay, *Cathartes*, *Colaptes*,
Melospiza melodia, Catbird nest 4
eggs in blackberry 3 ft.

Lowhee, nest 4 young
half grown, *Piranga erythron-*
cladus, 2 pairs.

Worm-eating Warbler's nest
still contains but 1 egg + 1 Cowbird's
Nest about 15 feet from edge
of brook and 5 ft above it, in
bank covered with dead
leaves sloping to the north.

It is placed at the root of a
laurel bush, concealed by a
branch. In front and below
the nest lay a great mossy
log. Took nest + eggs
Sparrow Hawk, Grasshopper Sparrow,
Nighthawk.

Bonasa umbellus. - Three young
brought to house by man who
said he counted 12 young.
Feathers just sprouting.

White Leaf
Large, lower leaf at
base of plant
N.C. 2/24/14

George Louis Levee At
Concha May 14.

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf from an old book. The paper exhibits significant water damage and staining, particularly in the lower half, where large, irregular brown and tan stains are visible. There are also several dark, irregular holes or tears, notably one near the bottom left corner. The overall texture appears slightly rough and discolored due to age.

the present, becoming. Seen in
at right, ^{with} recording on front
left. Another set of ^{photographs}
various phases of hysterical
convulsions.

Calla hirsuta Hook.
Doubtless director of cyphus
anamp. (alacacphus)

to stop on Longfellow

Deerfoot Spring and
Chambliss at Fort Smith

These specimens collected from Rattle,

Butyr. Li. albini. Curcul. ed. Caucas.

Kingbird clearing over and K.

13th Eagle - 2nd. K.

half dozen seen on K. R.

foxes are all abundant
John P. Killed 4 in winter 1900-1.

Abundant at
Olney
Massachusetts
Cottontails
Squirrels

Mr. Daggett has some other
see photographs on numbered plates
Oster - Mr. P. trapped 140 at
year ago in one season.
got 5-25 for skin (12197)

Deer - John Daggett has killed
about 100 Deer about Aug. P.O.
from Dec 4, 1892 to date.

Mosquitoes all over - St. Johns
Meadow at head of St. J. R. (common)
Notes abundant
Hairy, Fox, Cat, Squirrels common
Long-eared bat

Witchamans under bark dead trees
Mammals. John saw an
Indian River, at Seaboard. In
saw one that had been opened.
Saw another at one place about
thick side when green. Hides about animal

May 1 1901. Left
Alligator Swamp on table
about 1000 ft. 3 and

Went up the Kiamichi River
Rattlesnake Bay where we had water
the night at 10 P.M. started
before that we came when
a flock of 6-8 nearly half-grown
cubs following around in
mist-chimney trying to reach
Nasima. We passed them.

May 2

In the Kiamichi River we
saw no Kingbirds, nor on
Lake Kiamichi. We saw many
Purple and Fla. Gallinules,
a few Coots, Great Blue Herons,
about 25 Kingbirds, hundreds
of Cuckoos, Little Blue, etc. Night
the. Night Herons. On the right
of several swamps of water lilies
- Kingbirds one west of A.T. not.
+ one of A. white. isolated
single birds of A. white were
occasionally found. In one
at young and nearly full grown

Albion, shot by the
18 eggs in a house.

April 13 shot female Rattlesnake
containing 18 eggs nearly as
large as hen's eggs; soft shelled
soaked the skin; head shot away.

John J. Padgett has seen their tracks
where they had killed my palmetto
buds to eat, on Padgett Creek.

Barnard Co., Fla. up to 1800,
when they lost that locality.
No one then was seen
in the Sangre de Cristo on back
Island, Coconino Co., Fla.

Padgett - John J. Padgett killed
a Panther in May 1899 on Fort
Drum Creek. "Cut a bear free
& went after the honey. Found a
deer killed by Panther (bale eaten
in side of bear belly). Panther 20 ft
away. Dog freed him. Shot &
wounded. Took out of live and
was shot after hard fight with
the dog. We back-knived the
Panther before he caught the
bear.

Mr. John J. Padgett killed
3 Panthers in a hammock
on Padgett Island in 1898, when
the horns were in velvet. They
came up from hammock (man)
and down with deep trailing.
He & Fred shot her. His track
broke him over her head just
as going shot her. Next day
went back and shot both young
about half grown.

Panthers were formerly abun-
dant, but are now scarce
about Ocala, where Mr.
James J. Padgett, P.M., has
killed several during a residence
of 24 years. He also killed
lots of Bear there.

They are still common at Ocala
Well. - Horn seen for 4 years
common 7 years ago. Mostly killed
off by Florida - Ocala boys.
in the Province.

April 13, 1901. - Left Dodge
 Hammock and jumped for
 noon in the middle of Mt.
 Rosemount Prairie. Found
 a lot. Found the open air
 to be good. Found 3 pairs of
 brown owls; shot the pair
 birds; one out of the three
 nests, 1st egg, 2d on egg,
 third 3 eggs. Saw 3 other
 pairs of all birds.
 Country covered with good grass
 with scattered oak & cottonwood
 trees, some oaks in some
 willow wood in which there
 are many good nests.
 Some among bunches of grass.
 These were, *Thryothorus*, *Thryothorus*
infernalis, *Thryothorus* red.
 Saw one *Thryothorus* on a
 cotton tree a number of the
Thryothorus in plain hammocks.
 Shot one *Thryothorus* crossing
 the prairie.
